Consolidated Fee Schedule	43
---------------------------------	----

Introduction

Sandy City provides its citizens many different services. These services are only possible because there are revenues to pay for them. If there was a shortfall in revenues, services would have to be curtailed. For this reason the Finance Department spends time doing revenue forecasts. It is extremely important that revenue forecasts are accurate, because expenditures are budgeted based on how much revenue will be generated. Revenue forecasting is done by looking at individual revenues over time to get an idea of where they could be expected to go in future years. The forecast is also based on the economic forecast for the next year.

There are times when unexpected events happen and revenues fall short or expenditures are greater than expected. In order to counter this, the City budgets revenues and expenditures conservatively. Revenues are budgeted slightly lower than the forecasted amount and expenditures are slightly increased over actual expectations.

GFOA recommends that governments “prepare and maintain a revenue manual that documents revenue sources and factors relevant to present and projected future levels of those revenues.” (Recommended Budget Practices 9.3, National Advisory Council on State and Local Budgeting)

The Sandy City revenue manual was prepared as a companion to the budget document. This document contains a more detailed inventory of revenues received by the city’s various funds. This document:

- Provides the user a review of all major revenue sources.
- Analyzes the subsidization/cost recovery for applicable fee type revenue.
- Provides city departments with information to effectively budget their future revenues.
- Provides city staff and council a means of identifying revenue risks and opportunities.

The manual is organized to follow the same order of funds and account numbers as found in the current budget book. A typical entry for each major revenue source may include the following: the revenue account number; the authority under which a fee or tax is imposed or a revenue producing activity is pursued; a description of the revenue source; a statement indicating the rationale or purpose behind the revenue source; a current schedule of fees or charges; cost recovery of fees compared to city subsidizations; and the dollar amounts of revenues generated over the past several years as well as projections for the current and up-coming year.

Hopefully, this manual will be a useful tool for evaluating the various revenue sources available to Sandy City.

Budget Services
Sandy City
FY 2013-2014

Methodology

It is important to note that because of various revenue sources, many different methodologies were used to determine user fee amounts. Understanding each methodology is fundamental in determining appropriate levels of subsidization and cost recovery. Listed below are some of the primary ways that fees were determined.

- Some revenue sources are set by statute. Examples of this would include ambulance fees, which are set by the state or the innkeeper fee amount which is also set by state code.
- Many of the fees in Sandy City have been set based on studies conducted by professional consulting groups. These would include the Impact Fee Study done in 2005 or the Business License Fee Study.
- Other fees are set in order to be competitive with similar services offered in other jurisdictions. An example of this would be proprietary operations such as the golf course or Alta Canyon Sports Center which need to be competitive to similar institutions in order to maximize revenues while covering costs.
- Some fees are determined by the costs required to provide a service. For these fees calculations are made to determine the total costs to the city. First, total direct costs were determined which include wages, benefits, materials and time. Next overhead costs were calculated. Overhead expenses are costs not directly related to the service, such as facility, maintenance, and administrative costs. For the purpose of this revenue manual an average overhead cost has been used city wide.

Calculating overhead costs for each department becomes less accurate since departments may encounter difficulty when they try to factor overhead items such as indirect labor, interest, rent or utilities into their price. These costs are not easily attributable to a particular product or service and often one or more is overlooked. For the purpose of this study it is less nebulous to use an average overhead cost for the city. The average overhead percent was determined by taking

$$\text{Overhead Expenses} / (\text{Direct Costs} + \text{Labor}) = \text{Overhead Percent.}$$

In an ever changing market, when overhead expenses can be determined as a percentage of direct costs plus labor, they should be re-evaluated on an annual basis.

Finally, we take the average overhead percentage and apply it to the calculated direct costs. This helps the city better understand how revenue and subsidization trends for the various fees.

Additional policies and guidelines are set forth in the next section

Sandy City is funded through two categories of revenue, taxes and fees. Tax revenue is primarily used to pay for services provided to the public in general such as police, fire, streets, and parks. The city also provides services that benefit specific groups of citizens for which a specific fee is charged which is intended to pay for all or part of the costs incurred to provide that service. The city follows the revenue policies below:

REVENUE POLICIES

- Sandy City should estimate revenues conservatively to avoid unexpected deficits and to provide a funding source for capital project needs.
- Sandy City should minimize the use of one-time revenue to fund ongoing services.
- Sandy City should aggressively collect all revenues or taxes due.
- Sandy City should annually review user fees, impact fees, license and permit fees, and special assessments:
 - To determine that the full long-term service costs are not being subsidized by general revenues or passed on to future generations of taxpayers.
 - To determine the subsidy level of some fees.
 - To consider new fees.
- Sandy City should waive or defer fees only in accordance with the administrative appeal procedure under standards set by the City Council. All fees waived or deferred must be documented and submitted to the City Treasurer. Any fee determined to be uncollectible must be approved to be written off by the Finance Director.
- Sandy City should seek to maintain a stable tax rate. Generally, taxes should not be increased unless:
 - Inflation has clearly forced operating costs upward faster than tax growth.
 - New services are instituted to meet citizens' needs.

REVENUE ANALYSIS

User Fees – User fees are based on an analysis of how much of the cost should be covered by the fee versus how much should be subsidized by general taxes and revenue. Factors considered in the analysis include:

- How the fees compare with those charged by other cities.
- Whether the service benefits the general public versus a defined user such as an individual or group.
- Whether the individual or group receiving the service generated the need and therefore the costs of providing the service.
- Whether imposing the full cost fee would pose a hardship on a specific service.

- Whether the same service can be offered privately at a lower cost and whether the level of fee affects demand for service:
 - a. Is it possible and desirable to manage demand for a service by changing the level of the fee? (Increasing a fee may cause significant decline in demand for the service and, correspondingly, decreasing a fee may create a significant increase in demand.)
 - b. Are there competing providers of the service in the public or private sector? (The existence of competition may determine a competitive "market rate" for the service.)

General Taxes & Revenue – The next section will provide information on the major tax revenue sources used to fund the city's general government services. Each source will have information on:

- How the tax is calculated
- Significant trends
- Underlying assumptions for the revenue estimates

DESCRIPTION OF FUNDS

The Governmental Funds include those activities that comprise the city's basic services. They account for essentially the same functions reported as governmental activities in the government-wide financial statements. The major governmental funds are listed separately below and the non-major funds are consolidated:

The General Fund is the government's primary operating fund. It accounts for all financial resources of the general government, except for those required to be accounted for in another fund.

The Storm Water Fund accounts for the city's revenues and capital expenditures associated with drainage for storm water run off.

The Debt Service Funds are used to account for the accumulation of resources for payment of general long-term debt principal and interest and special assessment levies when the city is obligated in some manner for the payment. The city's debt service funds include the General Purposes Debt Service Fund, the Auto Mall Special Improvement District Fund, and the Special Improvement Guarantee Fund. Debt incurred by enterprise funds is not accounted for in the debt service funds but internally within the enterprise fund.

The Capital Projects Fund accounts for the resources used to acquire, construct, and improve major capital facilities, other than those financed by proprietary funds. The principal source of funding is contributions from developers restricted for capital construction, operating transfers from the General Fund, grants, and bond proceeds. All funds received for a particular purpose are restricted and used specifically for that purpose.

Other Governmental Funds include the non-major funds which are the following: the Redevelopment Agency, the Landscape Maintenance Fund, the Community Development Block Grant (CDBG), the Recreation Fund, the Community Events Fund, the Sandy Arts Guild, the Electric Utility Fund, and the General Trust Fund. Though combined for purposes of this schedule, additional information is available for each fund elsewhere in this book (see the table of contents).

The Internal Service Funds account for the financing of goods or services provided by one department or agency to other departments or agencies of the city on a cost reimbursement basis. The Internal Service Funds include the Fleet Fund, the Information Services Fund, the Risk Management Fund, the Equipment Management Fund, and the Payroll Management Fund.

The Enterprise Funds include those activities that operate similar to private businesses and charge a fee to the users that is adequate to cover most or all of the costs. These functions are presented as business-type activities in the government-wide financial statements. The city reports the following enterprise funds:

The Alta Canyon Sports Center Fund accounts for the activities created by the Alta Canyon Recreation Special Service District.

The Water Fund is used to account for the operations of the city's water utility.

The Waste Fund accounts for waste collection services provided by an independent contractor.

The Golf Fund is used to account for the city's golf course.

FY 2014 General Fund Financing Sources

After a few years of declining revenue Sandy City is projecting a small increase for FY 2014. With current economic conditions, and volatile sales tax constituting more than a third of the general fund revenue, total FY 2014 General Fund Revenues were budgeted just slightly higher than FY 2008 actuals.

Major General Fund Revenue Sources

The above chart shows the six-year trend for five revenue sources which comprise nearly 77% of the general fund revenue. It is important to maintain balance among major revenue sources. Sales tax revenue fluctuates more with the economy than the other revenue sources. Because Sandy has been in a growth mode for the past 30 years, much of the fluctuation caused by the economy has been mitigated. As the city approaches maturity, balance among revenue sources will become even more important. The chart above shows that while sales tax and franchise tax have increased in recent years, property tax, state road funds, and motor vehicle fees have remained relatively stable or have declined.

Sales tax is Sandy City's largest revenue source contributing more than 36% of general fund revenue. State Law authorizes cities to receive sales tax revenue based on the process described in the chart shown here. Sales tax revenue is forecasted by the finance department using a qualitative method which makes assumptions about each of the relevant factors in this distribution model. Trends in each of the relevant factors were analyzed as follows:

State Law – No changes in the rates specified in state law are anticipated.

Population Data – Changes in population data can significantly impact sales tax revenue. The 2010 census shows a significant decrease to Sandy's population. As a result, the State Tax Commission has updated population estimates for distributing sales tax revenue. Sandy now receives a smaller share of the statewide sales tax than in past years. Going forward, Sandy's population is expected to keep pace with statewide population growth.

Statewide Sales – With half of the sales tax revenue coming from the statewide pool, the amount of statewide sales is a major factor in the estimate. The overall growth estimate is just over 1%.

Sandy City Sales – With the other half of sales tax revenue deriving directly from sales made in Sandy, it is important to project separately the growth in retail sales made in Sandy. The FY 2014 forecast for Sandy base sales reflects growth similar to the expected statewide trend.

General Sales & Use Taxes

Franchise Tax

Fund 1-0-3113

Franchise Taxes are the second largest revenue source generating 18% of general fund revenue. State law authorizes cities to collect up to 6% on utilities operating within city boundaries. The relevant factors in forecasting franchise fee revenue are as follows:

Tax Rate – Sandy City charges a 6% franchise tax to the electric and natural gas, and water utilities. The water utilities franchise tax has been newly added to the Sandy City water utility. In addition the City charges 5% for cable television and 3.5% for telecommunication services (set by state law).

Utility Rate – Changes in utility rates affect the revenue collected by the utility and therefore the amount of tax remitted to the city. Utility rates are regulated by the Public Service Commission. It has not been uncommon to experience rate decreases as well as increases. Any announced rate changes are factored into the revenue projections; however, the projections for FY 2014 assume no rate changes.

Usage – Utility revenue is sensitive to changes in usage. The electric and natural gas utilities can be affected in particular by the weather. The projections take weather variations into account and assume a normal weather pattern. The size of households also has some affect on utility usage. The average household size in Sandy has decreased in recent years, which has resulted in reduced usage.

Motor Vehicle Fees

Fund 1-0-3115

Motor vehicle fees account for just over 1% of general fund revenue. The fee is a personal property tax for passenger cars and light trucks. It is a uniform fee based on the age of the vehicle. The fee is applicable to passenger cars, light trucks (including sport utility vehicles), and vans. These fees are due at the time of registration, even on new vehicles and vehicles that are registered more than once during a given year.

The fees collected are transmitted to the county where they are distributed to the taxing jurisdictions in proportion with the property tax revenue. As a result, the distribution is affected by changes in tax rates and growth in other jurisdictions. Other county jurisdictions have increased property taxes while Sandy has not. The result is that Sandy has received a smaller portion of the available motor vehicle fees. A qualitative method is used to project revenue based on past trends.

Property tax is Sandy City's third largest source of tax revenue accounting for around 16% of general fund revenue. It should be noted that the Alta Canyon Recreation Center, which is managed and operated by Sandy City, also levies a property tax. By virtue of Alta Canyon's status as a special district, this tax is separate from the Sandy City property tax.

Truth in Taxation – In order to understand property tax in Utah it is necessary to understand a section of Utah Law known as "Truth in Taxation." The county is responsible for administering property taxes and each June it submits to the cities a certified tax rate that would generate the same amount of revenue as the previous year plus any new growth. The certified tax rate does not provide for additional tax revenue due to increased valuation of existing property. If the city chooses to adopt a tax rate higher than the certified rate, state law has very specific requirements for newspaper advertisements and public hearings from which the name "Truth in Taxation" is derived.

Revenue Projections – The relevant factors in the preliminary property tax forecast include the tax rate and new growth. According to state statute, the adopted tax rate and budgeted revenue is provided by the Salt Lake County Auditor's Office in June.

Property Tax Rate – Sandy City's property tax rate is modest when compared to its neighboring cities and similar sized cities in Utah as illustrated in the chart below. The FY 2014 budget does not include an increase in the tax rate.

New Growth – New growth is initially estimated using a trend analysis and using a report of new construction generated by the city's Building Division. Since the growth number used in the final budget must be the county's number, adjustments are made as needed.

State Road Funds generate 5.6% of general fund revenue. This revenue source is the city's share of the B & C Road Fund administered by the Utah Department of Transportation with the primary source being the \$0.245 per gallon tax levied on motor fuel. Sandy City receives its allocation through a formula weighted 50% on the city's proportion of the state's population and 50% on the city's proportion of the state's road miles.

The chart below illustrates that the money received from the state road fund is sufficient to cover about 25% of the road-related costs. In fact, the streets budget alone is more than the revenue received from state road funds.

Though generated primarily through taxes, state road funds are limited in use and therefore not classified, for purposes of this budget book, among general taxes and revenue. However, it is a significant enough revenue source to merit further explanation here. A qualitative method is used to forecast State Road Funds based on trends for each of the following factors used in the formula: population, road miles, and available road funds.

Population – As discussed earlier in the sales tax section, in FY 2014 Sandy's population is expected to keep pace with statewide population growth. The FY 2014 forecast reflects this trend, as a percent of the statewide population.

Road Miles – Also attributable to the slowing in development relative to the rest of the state, the city's proportion of road miles is in slow decline. Again, the forecast reflects this trend.

Available B&C Road Funds – Gas tax revenue is based on consumption rather than the price of fuel. In reality, an increase in fuel prices can result in lower consumption. In contrast, economic recovery can increase consumption. The assumption for increase in available B & C Road funds, based on the aforementioned factors, is the same as the FY 2013 estimates.

State Road Funds Compared to Sandy Road Costs - FY 2014 Budget

Source

This revenue is collected from the sale of maps, copies, and information as well as from services provided for GRAMA requests. Revenue from reports throughout the departments goes into this account.

Examples of this are police reports, IS reports, and other similar work.

Collection**Cost Recovery**

Fee Information	2014 Budget	Actual Cost	City Subsidy
31491 Sale of Maps, Copies & Information			
Misc. Copies - Public / page	\$0.16	\$0.16	\$0.00
Misc. Copies - Employees / page			
Black & White 8.5 X 11	\$0.08	\$0.16	\$0.08
Color 8.5 X 11	\$0.20	\$0.20	\$0.00
31491 GRAMA Requests			
Audio CD's / each	\$5.00	\$9.00	\$4.00
Copies / page	\$0.30	\$0.30	\$0.00
Research / hr. + copying charges	Varies	N/A	N/A
31497 Passport Application Fees			
(In Addition to State Department Charges)			
Execution Fee / application	\$25.00	N/A	N/A
Photo Fee / photo	\$10.00	N/A	N/A
Overnight Express Mailing	\$25.75	N/A	N/A

Rationale

The City Recorder's Office preserves and manages city records, documents, and contracts according to Utah State Code requirements. The office charges fees for the sale of maps, copies and information as well as responding to GRAMA requests. These fees should cover the material and labor costs associated with providing each service.

Revenue History and Projection**Sale of Maps, Copies, & Information**

Source

This fee is collected from the July 4th Booth rentals, and the special events food vendor insurance for those who want to be covered under our insurance.

Collection**Cost Recovery**

Fee Information	2014 Budget	Actual Cost	City Subsidy
3166 July 4th Booth (fee per booth)	\$130.00	\$248.27	\$118.27
316929 Special Events Food Vendor Insurance Fee*	\$65.00	\$65.00	\$0.00

*Actual cost to insure vendor through our insurance.

The fee for a booth rental is partly subsidized by the city. Nearly 50% of the actual costs are for materials (tent and side panel) with the other 50% covering personnel costs. In essence the booth fee covers the cost for the booth, but the labor costs are subsidized by the city. The Special Events Food Vendor Insurance Fee is the actual amount to insure the vendor through our insurance.

Revenue History and Projection**Community Events - Ticket Sales**

Source

The Sandy Arts Guild operates as an enterprise fund, and tries to recover the cost of providing services through fees and charges on those who use its services.

Collection

Fee Information	2014 Budget
31667 Design-Your-Season Plan	
Pick at least 6 shows to receive discount	15%
31668 Single Event Tickets	Per Ticket
Single Event Ticket Processing Fee	Per Vendor
31493 Amphitheater Rental / day	\$1,300
City Sponsored Group - Rehearsal	\$100
City Sponsored Group - Performance	\$200
Stage Manager Fee / day	\$175
Stage Manager Fee per additional hour	\$25
Tech Crew Fee / day	\$400.00
Sound or Light Tech Fee per additional hour	\$19.00
Spotlight Operator Fee per additional hour	\$12
House Manager Fee per additional hour	\$15
Cleaning Fee per additional hour per staff	\$15
Parking Fee / ticket (paid by promoter)	\$0.50
Building Fee / ticket (paid by promoter)	\$0.50
Security (per officer per hour)	Actual Cost
EMTs (per technician per hour)	Actual Cost
Spotlight Rental Fee / day	\$100
Fogger or Hazer Rental Fee / day	\$50
Screen and Projector Rental Fee / day	\$600
Cleaning Fee	\$100
31642 Venue Merchandise Fee	10% - 20%
318566 Youth Theater Participation Fee	\$20

Cost Recovery

The Sandy City Arts Guild currently recovers around 64% of the full cost of providing services through fees, grants and other revenue. The other 36% was transferred in from the General Fund.

Revenue History and Projection

Finance

Source

Innkeeper fees are an increasing source of revenue for the city, and explained in more detail below. The Finance Department also generates revenue through fees, and the sale of maps copies and information.

Collection

Cost Recovery

Fee Information	2014 Budget	Actual Cost	City Subsidy
3116 Innkeeper Fee - per Ordinance	1.5%	N/A	N/A
31611 Fees on Delinquent Accounts			
Annual Interest on Accounts	1.5%	N/A	N/A
Receivable Balance			
31699 Phone Payment Convenience Fee	\$4	\$4	\$0
3184 Collection Fees			
Non Metered Accounts	Constable Fees	N/A	N/A
Returned ACH (Direct Debit)	\$20	\$20	\$0
Returned Checks			
Returned from Bank	\$25	\$25	\$0
Courts NSF	\$20	\$20	\$0
To Legal Department for Collection	\$40	\$40	\$0
Sundry Billings			
To Legal Department for Collection	\$175	\$175	\$0

Rationale

Collection Fee - recovers the cost for returned checks from the bank or the legal department's involvement in the collection process. These are comparable to similar neighboring municipalities' fees.

Innkeeper Fee - This is paid by hotels, motor courts, motels, and similar institutions. The fee is set by ordinance and has restricted uses (see Utah Code 17-31-2 & 59-12-603). There used to be a local option for this fee. In addition to the authorized 1% tax, Sandy City also collects an additional .5% since this revenue had been pledged as a security for bonds. Sandy City is able to keep this local option until the obligation incurred has been paid. (Utah Code 59-12-353)

Revenue History and Projection

Source

Collected from the sale of maps, copies, and information service requests.

Collection

Businesses having over four false alarms within a 12 month period.

Collection

Fee Information	2012 Approved	2013 Approved	2014 Approved
314213 False Alarm Fees			
Over 4 False Alarms in 12 months	\$110	\$110	\$110
Each additional false alarm	\$110	\$110	\$110
Late Fee - 30 days	\$11	\$11	\$11
Late Fee - 60 days / additional	\$11	\$11	\$11
Late Fee - 90 days / additional	\$11	\$11	\$11

Rationale

The Sandy City Police Department provides police protection and law enforcement services. These services include checking on businesses after an alarm goes off. If one business has over four false alarms within 12 months they are assessed this fee to help cover the costs for providing the law enforcement service. The business may also be charged a late fee of \$11 for each 30 day late period. The maximum late fee is \$33, or three months. These rates are similar to other cities.

This revenue source is very unpredictable, but over the last ten year period there has been a substantial decline in false alarm fees which is good since the fees are meant to discourage false alarms and make sure alarm owners are being responsible.

Over 4 False Alarms in 12 months

Revenue History and Projection

False Alarm Fees

Source

Citizen requests for reports, photographs, evidence copies, or police work cards.

Collection

Cost Recovery

Fee Information	2014 Budget	Actual Cost	City Subsidy
31491 Reports			
Reports for first 3 pages	\$10.00	\$10.00	\$0.00
Each Additional Page	\$1.00	\$1.00	\$0.00
Fingerprints / card	\$10.30	\$10.30	\$0.00
Clearance Letters / Backgrnd Checks	\$10.30	\$10.30	\$0.00
Photographs			
Digital photos/page	\$14.04	N/A	N/A
Digital photos CD/DVD	\$18.72	N/A	N/A
Additional CD/DVD	\$14.04	N/A	N/A
3121 Business License Fees			
Police Work Cards	\$30	\$15	(\$15)
314215 Sex Offender Registration Fee	\$25	\$25	\$0
31423 Court Fees			
Drivers Awareness Class Fee	\$30	N/A	N/A
Alive at 25	\$40	N/A	N/A
Defensive Driving Course	\$40	N/A	N/A

Rationale

Reports - these fees try to recover the actual costs for time spent and materials. The main cost is for personnel costs. All photographs are now digital, hence a new fee schedule should be made for photographs based on the number of B & W or Color pages that are printed, instead of picture size or roll length.

Police Work Cards - This fee covers the cost to make a police work card which involves having finger prints and a photo taken. Because the time and materials needed to make a police work card are minimal, there may be a profit for the city to create a police work card. The fee is set to be comparable to similar municipalities' fees.

Court Fees - These fees are for the drivers awareness classes and are set by the courts. They are based on rates of neighboring municipalities. These fees are paid at the justice court building (Fund 1-15-3151).

Industrial (1000 sq. ft.)	\$57	\$57
Warehouse (1000 sq. ft.)	\$36	\$36
Mini-Warehouse (1000 sq. ft.)	\$6	\$6

Rationale

The Utah Impact Fees Act authorizes cities to charge impact fees for “public safety facilities,” which it defines as buildings “constructed or leased to house police, fire, or other public safety entities.”

Sandy started charging police impact fees in 2006 to help pay for police facilities needed to accommodate new development. A study was done by Duncan and Associates which determined the amount that Sandy should charge.

Revenue History and Projection

*An impact fee study was completed in 2005, Police Impact Fee revenue started in 2006.

Source

Sandy City pet owners. Registration permits are required for dogs and cats. There are also fine revenues for violation of ordinances.

Collection

Sandy City allows a maximum of six small animals but no more than two dogs at any address. Even homes that are zoned for livestock may only have two dogs. However, residents may apply for a hobby permit. If granted they will be able to have a maximum of five dogs at their home. A hobby permit costs \$70.00 per year. For complete fee information see the consolidated fee schedule.

Rationale

Most of the animal control fees cover the cost for providing the service. For example the license fee for dog or cat is \$6. This covers the cost for the actual animal tag, and the few minutes it takes to input the information into the database. Leashes are \$1 each, just to cover the material cost of the leash. Many of the other fees are based at a rate that covers the cost of material and time. Some fees however are kept comparable to other cities. Examples of this might include impounding, boarding, or other services which are kept comparable to other city's fees.

Revenue History and Projection

*This revenue is from a contract for providing animal control services to Cottonwood Heights.

Source

The fire department's largest revenue source (besides the general fund subsidy) is ambulance fees. Ambulance services now include some inter-facility transport.

Collection

Fee Information	2013 Approved	2014 Approved
314221 Ambulance Fees*		
Full Rates		
Base Rate / call	\$594.00	\$594.00
Mileage Rate / mile	\$31.65	\$31.65
Non-transport Trip / call	\$331.05	N/A
Air Ambulance Stabilization / call	\$331.05	N/A
Interfacility Transports	\$682.95	N/A
Intermediate Ground Rate / call	\$785.00	\$785.00
Advanced Life Support/Paramedic/call	\$1,148.00	\$1,148.00
Fuel Fluctuation Rate	\$0.25	\$0.25
Billable Medications/Procedures	Per Dept Schedule	Per Dept Schedule

*Ambulance fee rates are set by the State of Utah and are adjusted as often as the State adjusts the fee schedule. Also, when diesel fuel exceeds \$5.10 per gallon or gasoline exceeds \$4.25 per gallon, a surcharge of \$.25 per mile of transport may be added to the mileage rate.

Revenue History and Projection

*Starting in FY 2008 Sandy City Fire started providing inter-facility transport services.

**The decrease in FY 2010 is attributed to Gold Cross covering additional types of calls, and the economy which lead to fewer calls, and an increase in late payments

Source

The fire department collects revenue from inspection fees, hazardous material recovery and teaching courses such as first aid.

Collection

Rationale

The Utah Impact Fees Act authorizes cities to charge impact fees for “public safety facilities,” which it defines as buildings “constructed or leased to house police, fire, or other public safety entities.”

Sandy started charging fire impact fees in 2006 to help pay for fire stations needed to better accommodate new development. A study was done by Duncan and Associates which determined the amount that Sandy should charge.

Revenue History and Projection

*An impact fee study was completed in 2005, Fire Impact Fee revenue started in 2006.

Source

Those conducting excavation or construction operations on Sandy City public ways.

Rationale

Before any road cut permit is issued, Sandy City requires the applicant to obtain a minimum \$10,000/year excavation bond, Certificate of Liability Insurance, and Utah Contractors License Number. These permits control excavation and construction operations. It is also implemented to cover special requirements for work in general, maintenance, private construction, and additions to utility systems in the public way.

Collection

Fee Information	2014 Budget
3124 Road Cut Permits	
Inspection testing completed by city	Actual cost of testing
Concrete or asphalt road surfaces	\$200
Surface more than 3 years old	\$0.25/sq ft
Surface less than 3 years old	\$0.50/sq ft
Surface with fabric	\$0.50/sq ft
Fine for failure to complete (per day up to 5 working days)	\$250
Fine for non-compliance in work zone (Fine per incident)	\$250
Re-installation of road signs	Actual cost of sign
Road striping	Actual cost of striping
Repair to damaged city utility	Actual cost of repair
Repair to damaged city landscape	Actual cost of repair
Emergency trench repair	Actual cost of repair

Road cut permits are structured in a way to recover most of the cost for providing the services. The fees for inspections testing, re-installation of road signs, road striping, and repairs are set as the actual cost for each service. After completing a time-study on the permit process and evaluating the impact of excavations on the permanent road surface, staff changed the fee structure to better reflect the actual costs to process, inspect, and enforce all road excavation permits. See the consolidated fee schedule for a detailed list of road cut permit fees.

Park and Trail impact fee revenues are received from new development.

Collection

Fee Information		2012 Actual	2013 Actual	2014 Approved
3171	Park Impact Fees	\$296,646	\$375,528	\$300,000
3172	Trail Impact Fees	\$5,402	\$18,696	\$15,000

Rationale

Sandy City operates a number of parks and recreation facilities for the benefit of the public. Continued population growth will require the city to acquire and develop additional park land and construct more recreational facilities in order to maintain the existing level of service. Park impact fees are one method of ensuring that new residential development pays its proportionate share of the park capital costs attributable to growth.

Sandy City also provides an existing network of pedestrian, bike, equestrian and multi-use trails. This section calculates the maximum impact fees that the city could charge to ensure that new development pays its proportionate share of the capital costs of expanding trail facilities.

Revenue History and Projection

*The large increase in 2006 is due to the soccer stadium construction.

Source

Parks & Cemetery generates revenues through Park Reservation Fees, and Cemetery Fees.

Administration for this department analyzes each fee annually and increases are made based on rising costs for facilities, wages, fuel, utilities, and supplies. These charges and fees are set to be competitive with comparable parks, and to maximize use of parks within Sandy City.

Collection

Fee Information		2012 Actual	2013 Actual	2014 Approved
31441	Park Reservation Fees	\$ 101,358	\$ 102,577	\$ 100,000

The golf course operates as an enterprise fund, and tries to recover the cost of providing services through fees and charges to those who use its services.

Collection

Fee Information		2014 Approved	% of revenue
3181121	Cart Fees/Rental	\$ 310,950	19%
3181122	Concessions	\$ 62,300	4%
3181123	Green Fees	\$ 646,000	40%
3181124	Merchandise Sales	\$ 277,600	17%
3181125	Range Fees	\$ 150,200	9%
3181126	Lessons	\$ 6,000	0%
3181129	Miscellaneous	\$ 1,500	0.1%
341211	Transfer In - RDA	\$ 150,000	9.3%
		\$ 1,604,550	100%

Cost Recovery

Currently the golf course recovers just over 90% of the full cost of providing services. This includes the initial capital costs covered through bond issuance. Payments for the debt service is partially subsidized by the RDA Civic Center South which has transferred \$150,000 annually. Charges and fees for the golf course are set up to be competitive with comparable courses.

Revenue History and Projection

Source

This revenue comes from business owners in Sandy City.

Collection

Fee Information		2012 Actual	2013 Actual	2014 Approved
3121	Business Licenses & Permits	\$ 972,382	\$ 1,016,090	\$ 990,000

Rationale

In 1998 a comprehensive study was conducted by David Griffith & Associates, Ltd. They assisted Sandy City with developing a revised business license schedule consistent with the new requirements mandated by the State of Utah. The following year revenues increased 46%, which were more consistent with actual costs Sandy incurred for providing selected types of services to the business community.

In 2007, nearly ten years later, a new business license fee analysis was conducted by RedOak Consulting. However, only minor changes have been implemented to the fee schedule because of the study.

In FY 2008 Community Services (formerly department 55) was dissolved and combined with Com. Dev. Administration (department 50), Planning (department 51), and Building & Safety (department 52). With the addition of more businesses to the city, and changes to the fee schedule revenue has increased by an average of 6% over the last 10 years. For a complete list of all business license fees see the consolidated fee schedule.

Revenue History and Projection

Source

As shown below, around 75% of the planning dept fees come from planning development and inspection Fees. Other revenues come from grants, rezoning, sign permits, and other development fees.

Collection

Fee Information		2014 Approved	% of revenue
31229	Sign Permit Fees	\$ 15,000	14%
314511	Planning Development Fees	\$ 60,000	55%
314512	Inspection Fees	\$ 25,000	23%
314515	Other Development Fees	\$ 10,000	9%
		\$ 110,000	100%

Cost Recovery

The Community Development Department annually calculates the cost of providing the various services reflected in the fee schedule. Adjustments are made to bring some fees more in line with other similar services. In general, the fees for basic services cover a smaller proportion of the cost than do the fees for those services that are a special request.

Revenue History and Projection

Cost Recovery

As previously mentioned the Community Development Department annually calculates the cost of providing various services. The following data shows the cost recovery for many of the planning fees.

Collection
